Who was the first man in space?

A space fact is written in the code below. To break the code work out the problems and match the answer with a number in the code. Then write the letter of the problem above the number.

「50 x 7 =

**G** 50 x 11 =

2100 • 250 • 2550 • 200 • 250 • 500 • 1500 • 650 • 350

450 • 650 • 150 • 100 550 • 1500 • 150 • 550 • 1500 • 150 • 100 • 500

**M** 50 x 4 =

 $R_{50 \times 3} =$ 

 $E_{50 \times 44} =$ 

 $O_{50 \times 5} =$
