Cut out and laminate these shapes. Give a set to each pupil (or group of pupils, depending on the activity).

Encourage them to build different numbers and then to decompose larger numbers into their constituent parts.

These cards can be used in conjunction with a Gattegno chart.

You can download one **FREE** from

http://www.andrewjeffrey.co.uk/uploads/place_value_chart.pdf

A second, non-coloured set is included for classes who do not want or need the colour scheme.

Have fun!
